

1. In Edit mode, click the Edit button and choose “Add a Page”.

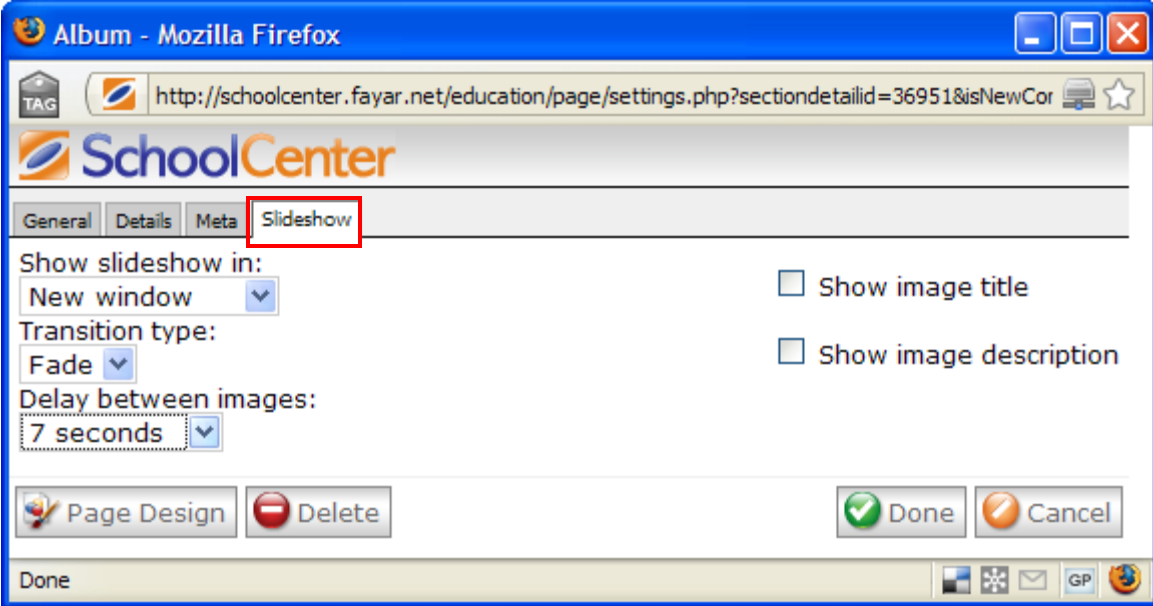

2. Choose Album from the Page Choices pane. Then click Add Page

The screenshot shows a Mozilla Firefox browser window with the title "Add a page to Technology Integration - Mr. Hill". The address bar contains the URL "http://schoolcenter.fayar.net/education/page/adddetail.php?sectiondetailid=16009". The page header features the "SchoolCenter" logo. The main content area is titled "Please choose a new page to add to Technology Integration - Mr. Hill". On the left, a "Pages" list includes "Album", "Blog", "Class Projects", "Classroom Calendar", "Contact Form", "Create a Custom Form", "Custom Link", "Document Manager", "Forum", "Guestbook", "Opinion Poll", "Questions and Answers", "Scrapbook", "Search", "Site Map", "Test Bank", "Useful Links", and "What's New". The "Album" option is highlighted. To the right, the "Album" section contains the text: "The Album page is an easy way to store images on your site. Visitors can cycle through the images or view the images as a slideshow." and an image of a photo album. At the bottom right, the "Add Page" button is highlighted with a red box, and the "Cancel" button is also visible. The status bar at the bottom shows "Done" and various system icons.

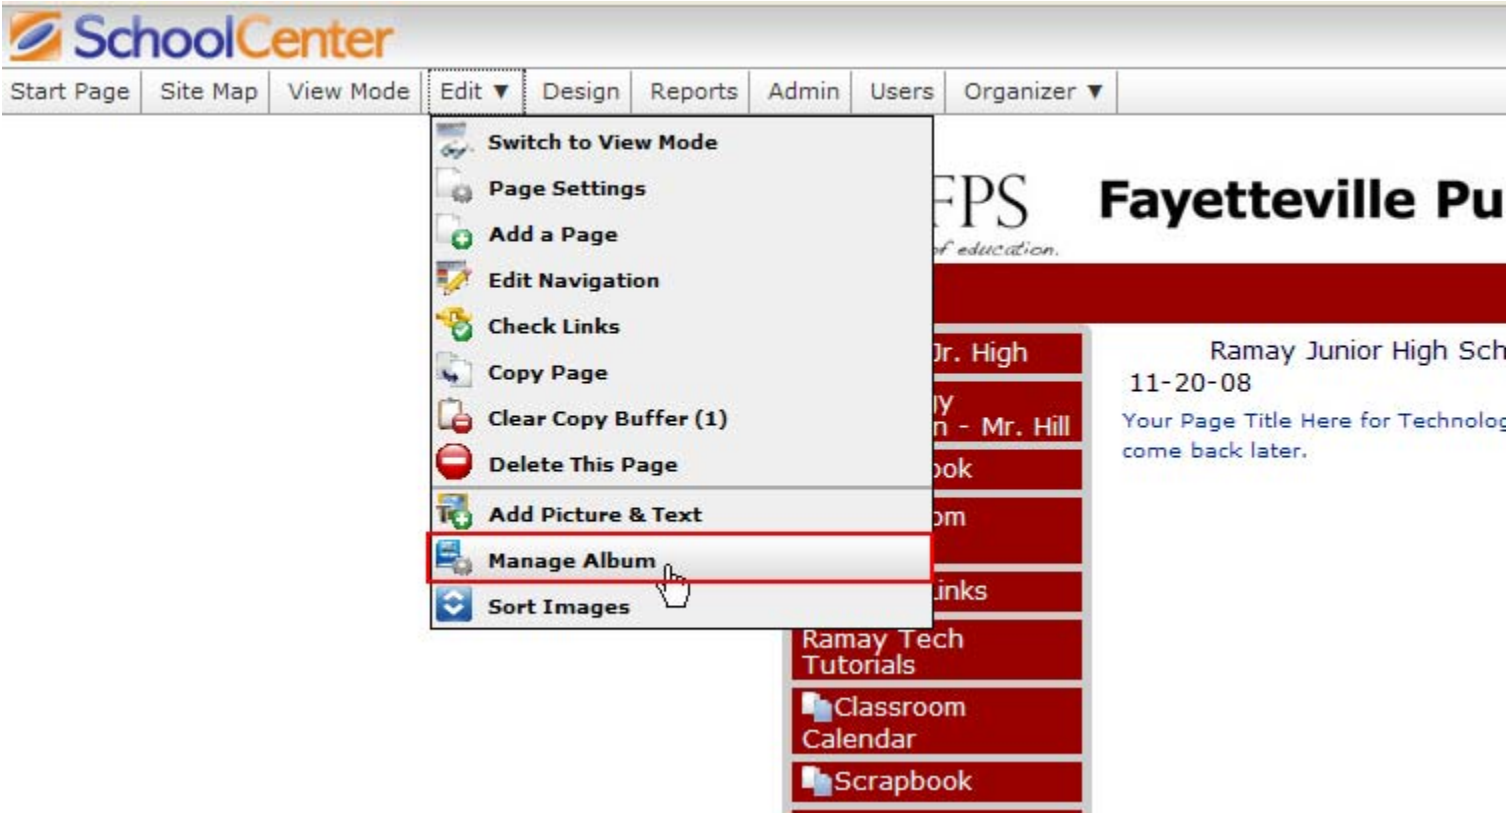

3. Name your page.

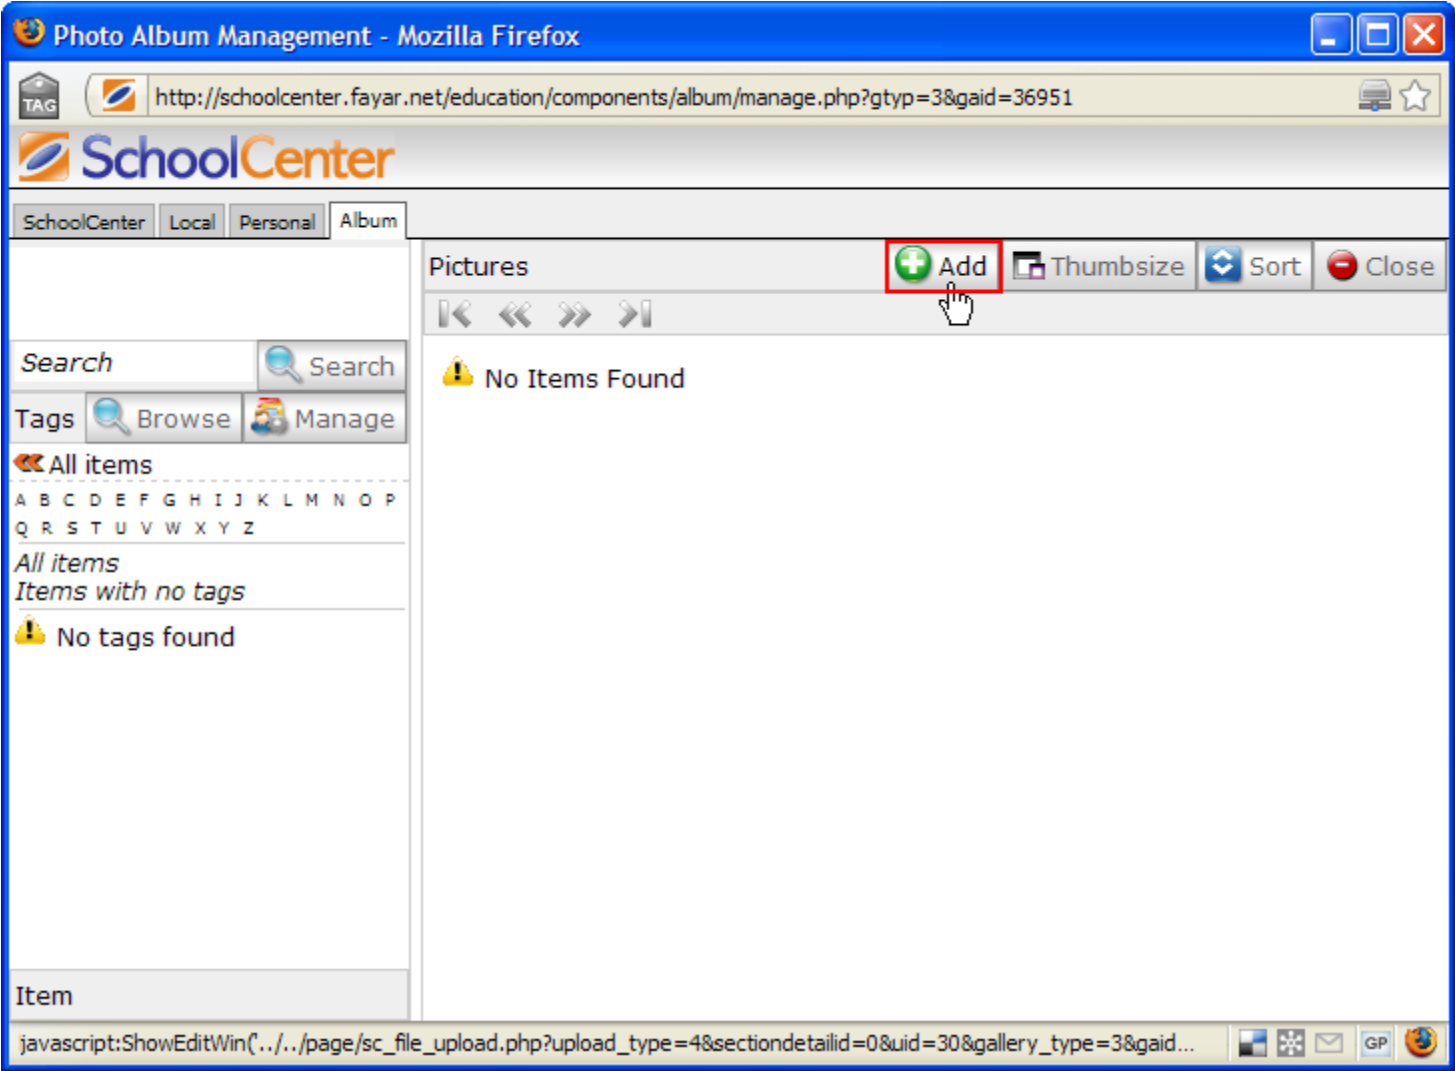

4. Click on the Slideshow tab. You'll probably want to set the delay to 5 seconds or more, but that's your preference. Click Done when finished.

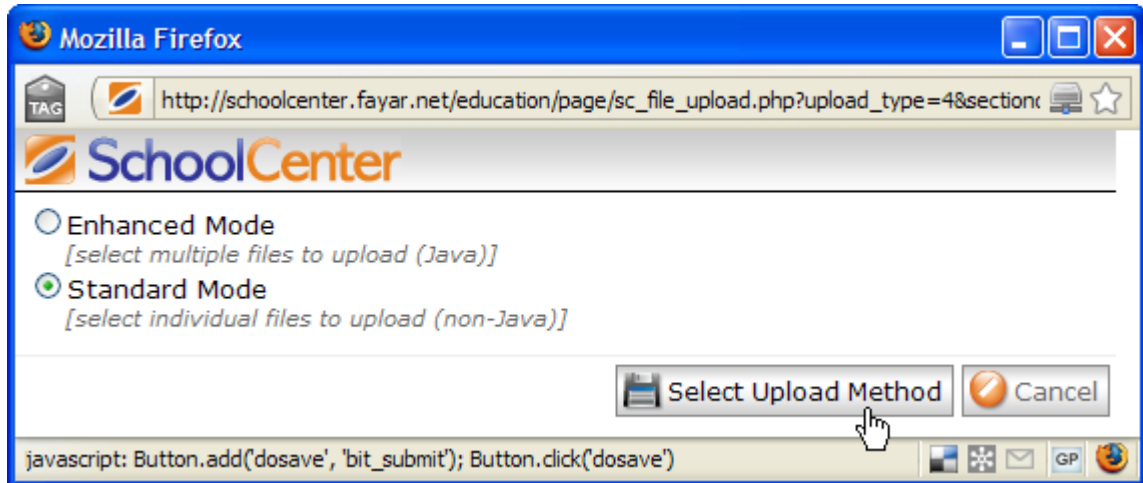

5. Your new Album page is ready for you to add pictures. Click Edit, then Manage Album.

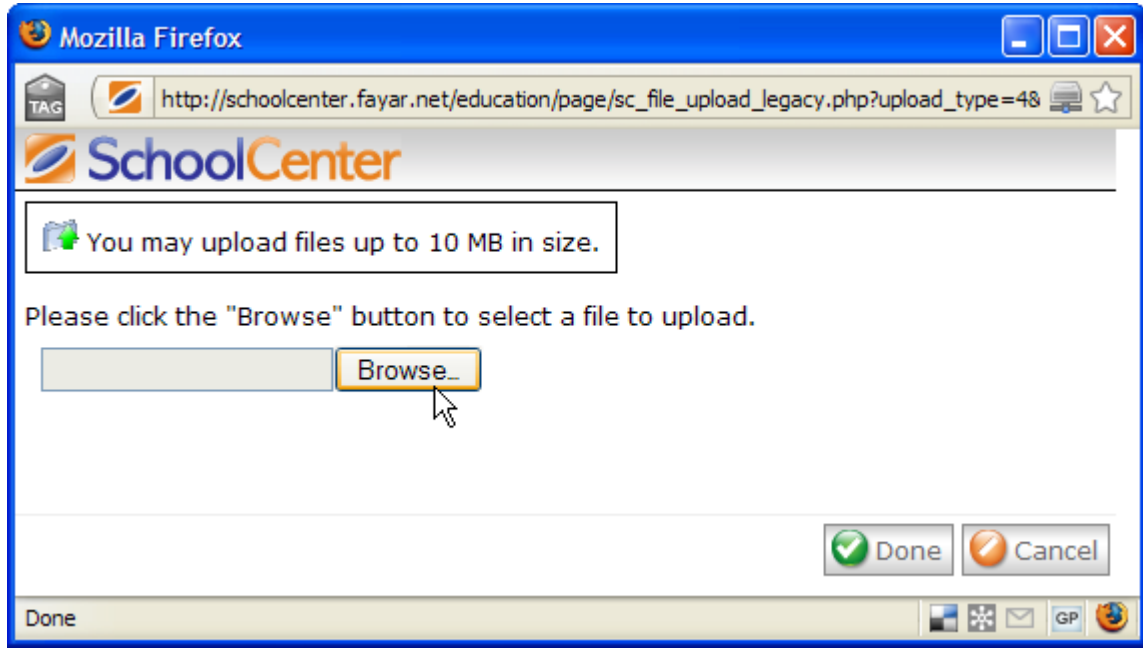

6. Click the Add button to start adding pictures.

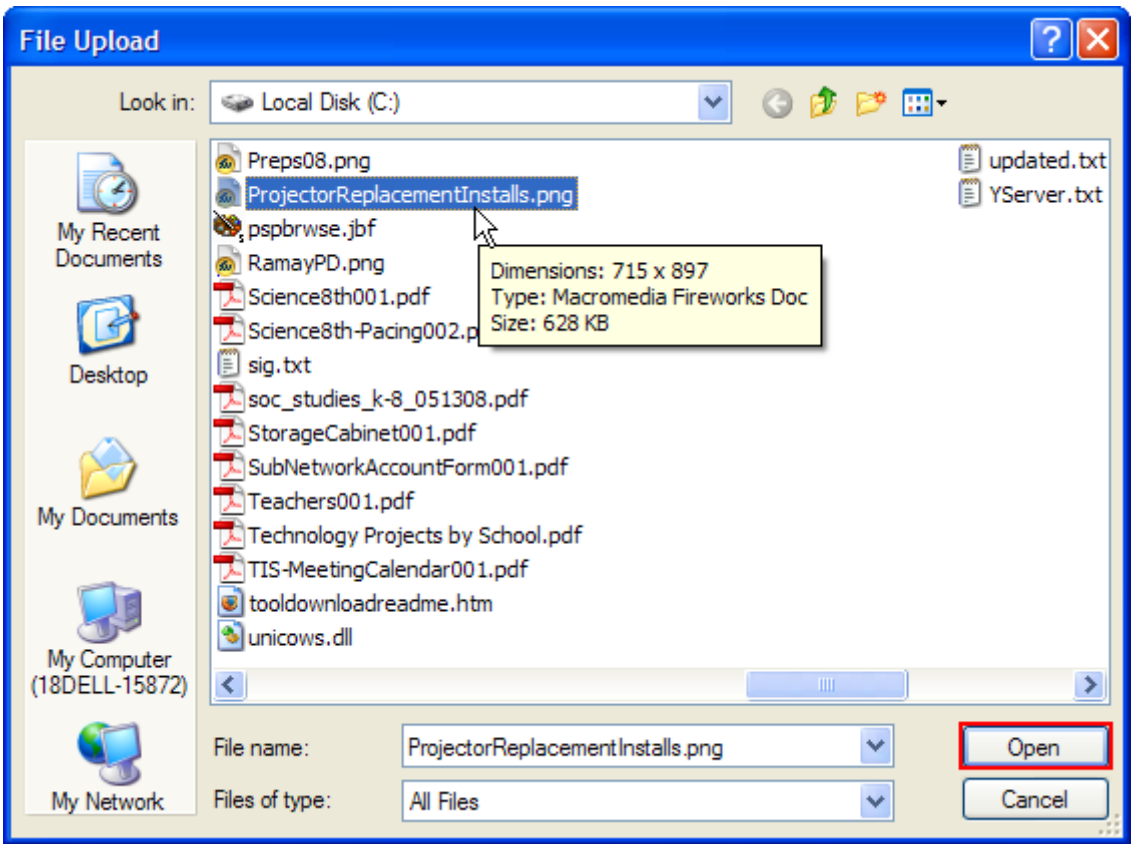

7. Choose "Select Upload Method".

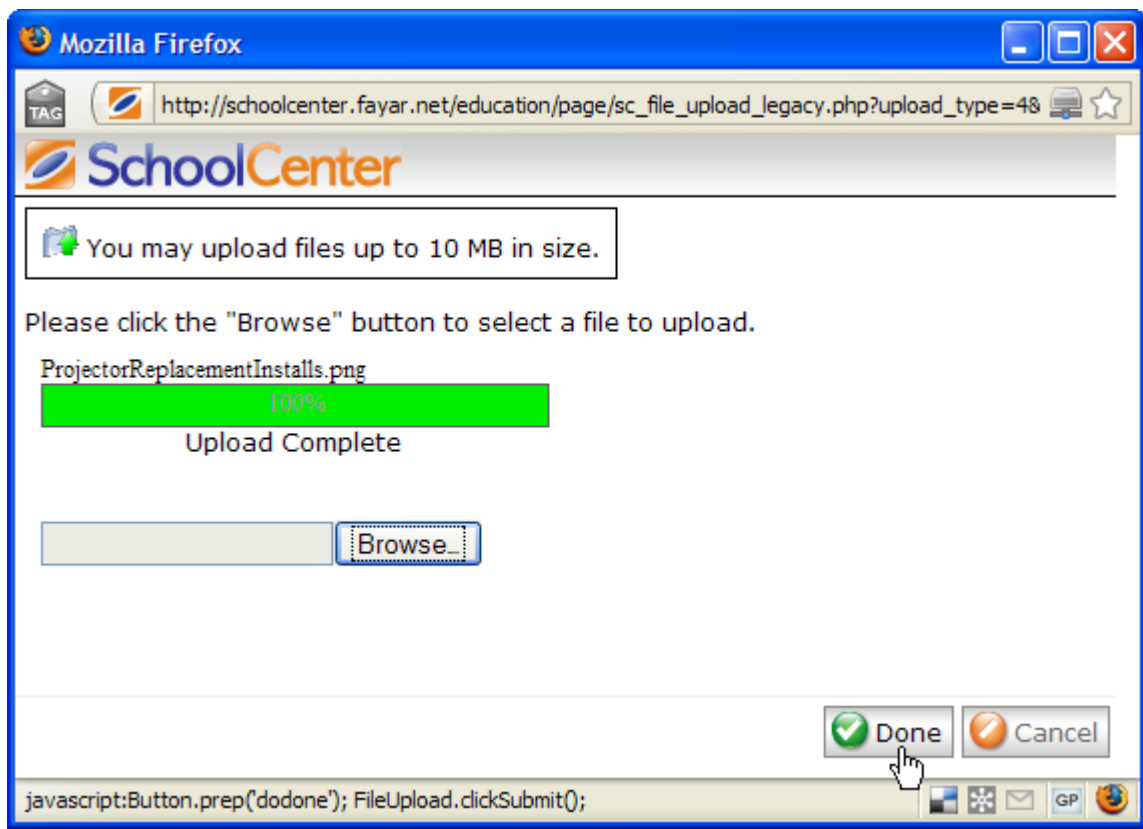

8. Click the Browse button to navigate to the location where your pictures are stored.

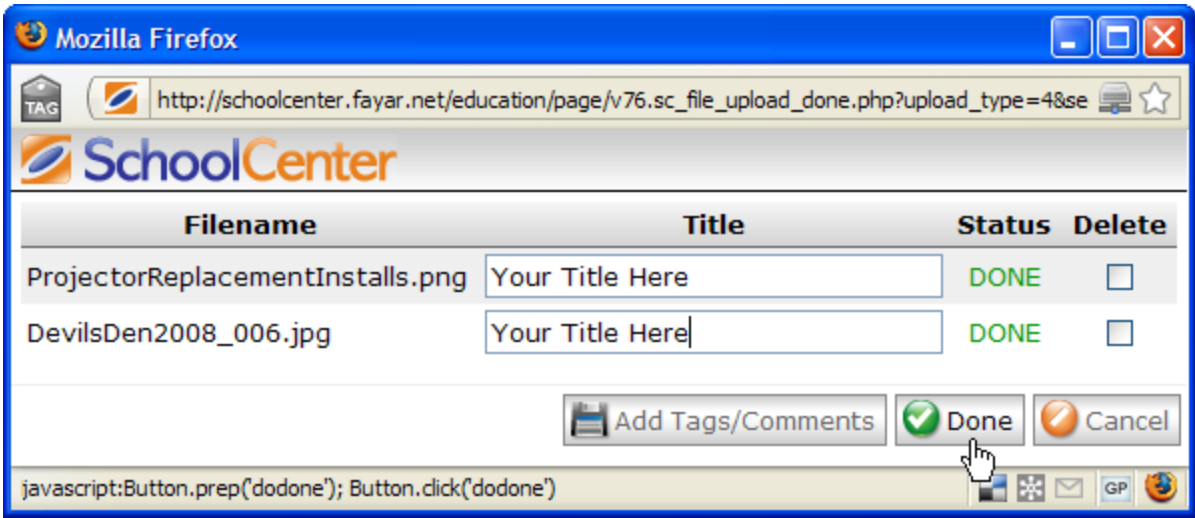

9. Click on the image file you want to add to your album. Then click Open.

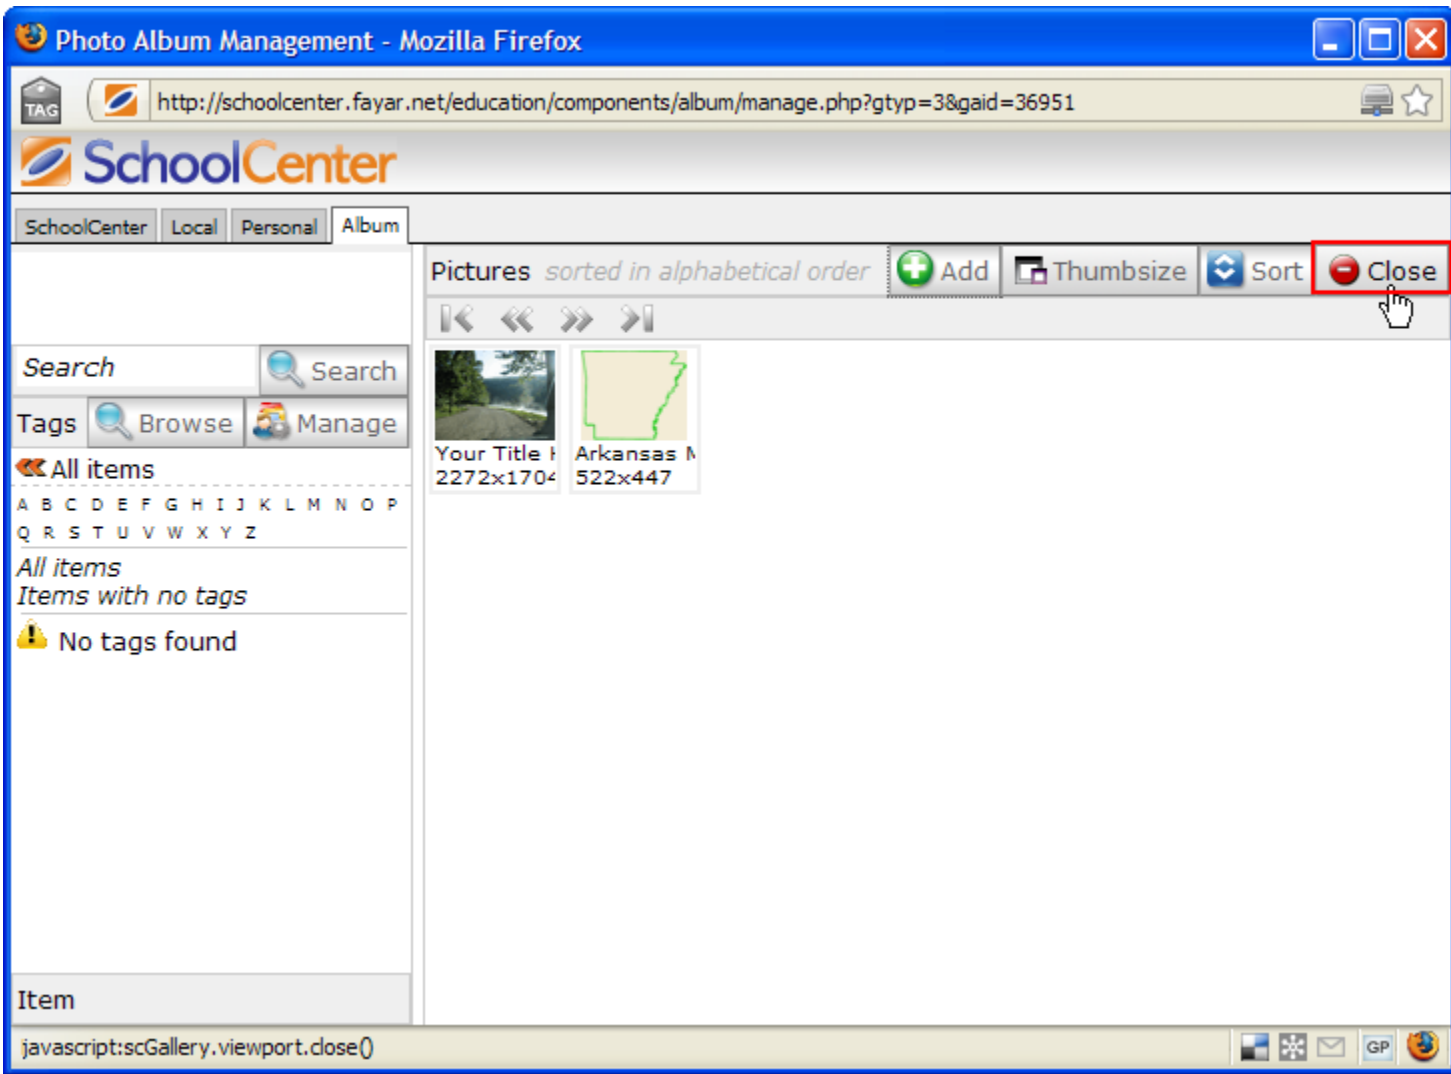

10. When you see that your upload is complete, you can either click the Done button, or you can click Browse again to select another image file.

11. You'll see a window where you can add a title to your image files if you wish. When finished, click the Done button.

12. You will see thumbnail images of the image files you uploaded. You can sort them here, add more pictures, or click close to exit.

13. This is how your page will appear to those visiting your page. Visitors can either click the thumbnail images, or they can click the Slideshow link to view the pictures in succession as a slideshow.
